In the past Mulder-Hardenberg has worked together with a lot of different customers in the machine building industry to help them with their challenges. See our related cases for some of the projects we've implemented for our customers:

**Dedicated industrial PC's**

One of Mulder-Hardenberg's business relations develops, builds and supplies equipment which checks for manufacturing defects in end products. These monitors are part of a console in the control room and play an important role in controlling and checking the entire process of dredging.

**EMC as a perpetrator**

During the design of costly measuring and testing applications apparatus. The components to be used are critically inspected.
